REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art on record does not teach combination of the elements of the independent claims. For instance, the prior art on record does not teach a plurality of columns of registers having plurality of multi-channel signals, an interconnection circuitry for allowing a first channel of the plurality of multi-channel data signals to be selectively shifted, at the same time, through a plurality of registers in a first and a second of said columns, and allowing a value at a single input of each column to be selectively routed to any register in said respective column by bypassing any register or registers that precede said register in said respective column. Furthermore, the prior art on record does not teach the combination of the above features with the output of the first column being allowed to be selectively shifted through a plurality of registers in the second column instead of the first channel that is received by the first and second columns at the same time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
